Welcoming all bull buyers past and future to our 2021 Bull Sale. Your support over the years is greatly appreciated. After a trying 2020, we were sure happy it ended with such great weather for the cattle. As we grazed well into December, the cows look healthy heading into the winter months.

This year we will be selling 65 AI sired bulls that represent the very top 30% of our calf crop. This group of bulls has been culled for quality in May, August, October, and December, assuring that only the top bulls make the sale. They are fed a high roughage ration to ensure soundness, fertility, and longevity. The home-grown ration allows for a smooth transition into their new home.

This year our sale includes No Doubt sons, which offer quiet dispositions, thickness, and performance. The Justify sons offer calving ease with muscle and extra weight gain. Sons of Abundance will offer that true beef bull look. There are many other sires to select for calving ease and performance that will increase profit in your herd.

The bulls represented in this sale are backed by over 40 years of AI breeding. With the help of technology these days, I find myself searching nightly for top genetics to incorporate in our herd. The cow herd is rigorously culled year after year to ensure only the top end remains.

This year DVAuction can be used to assist people unable to attend sale day. Videos will be posted on DVAuction for viewing before and on sale day. Contact Logan Hoffman at 701-388-2618 with any questions and to preregister for the sale. We will also be able to take phone bids if you are more comfortable doing that. Please give me a call prior to sale day to get things set up for your phone bids.

Thank you for showing an interest in our program. You can give us a call or stop by any time to view the bulls. As always, we offer free keep and free delivery in North Dakota and adjoining states after their semen test in April. The bulls are guaranteed 100% to be fertile and carry our breeding guarantee. A replacement will be provided if any problems should occur before September 1.
